

Assassin Plate System Jetting

Select the desired horsepower level and fuel type to determine the nitrous and fuel jet requirements i.e. if you have an Assassin Pro-Power plate system and you are running 8-10psi FFP (Flowing Fuel Pressure) with gasoline and want a 100 HP boost you would use two .041 N2O and two .031 Fuel jets.

Spark plugs should be at least 2 steps colder than stock gapped no larger than .035. Do not use platinum tip, extended tip or any plug with multiple ground straps or split ground straps. When in doubt about heat range always go one step colder.

Ignition timing should be retarded 2 degrees per 50 hp of nitrous being sprayed.

Check all jets for obstructions upon installation!!

Assassin Stage 6 Plate @8-10psi

HP	N2O	GASOLINE	e85	FFP
50	26	22	24	8-10psi
100	38	30	33	8-10psi
150	46	34	38	8-10psi
