

Custom Intake Plumbing

NITROUS EXPRESS, INC
5411 Seymour Hwy
Wichita Falls, TX 76310
Phone: (940) 767-7694
Fax: (940) 767-7697
Toll free (888) 463-2781
www.nitrousexpress.com

Intakes and accessories should be sent freight prepaid to the address above along with this form. NX will do its best to install all custom plumbing with maximum clearance for any accessories (fuel rails, injectors, fuel lines, throttle linkage, distributor, etc.), however no clearance guarantee can be offered for any accessories not provided at the time of plumbing. To guarantee adequate clearances, all accessories must be furnished when your manifold is shipped to NX. No exceptions. Oily intakes will be charged a cleaning fee

Direct Port Nitrous and Direct Port Water Methanol Systems

Includes drilling and tapping the intake runners, installing nozzles, bending hard lines, installing solenoids and leak checking the system.

8 Cylinder - \$400 per stage
6 Cylinder - \$350 per stage
4 Cylinder - \$300 per stage

Welding nozzle bungs on intakes - \$200 per 8 bungs

Installing custom spray bars in your intake manifold

Standard plenum spray bar installation includes straight nitrous/fuel bars with the fuel fittings on the front and the nitrous fittings on the back. Single bars are \$300 per stage and dual bars are \$400 per stage.

Additional charges:

Installations requiring bent bars - \$25 per bent bar

Fabricating center supports (required for spray bars over 6 inches long) - \$25 per support

Hidden Systems

Hidden systems are billed by the hour. Just give us a call to discuss you application and concealed options.

Custom Flowing Services

Off the shelf NX nitrous systems include a jet sheet that represents the average of many flow tests which results in very accurate jetting without the expense of custom flowing each nitrous system. We offer custom flowing services for customers who have a unique combination of parts or who want exact flow data on their specific components. Using a state of the art flow bench, we flow nitrous and fuel through your nitrous system and provide a comprehensive jet sheet with flow data in pounds per hour. We also provide fuel pressures required to achieve varying nitrous to fuel ratios ranging from rich to lean. Custom flowing services are \$400 per stage for Dry systems and \$500 per stage for Wet systems (Includes up to 4 horsepower settings per stage).
